Summary

Senior Technical Writer with 13+ years of experience across SaaS, HR, payroll, finance, and integration platforms. Focused on taxonomy, metadata, and modular content design, turning complex system behavior into structured, reusable documentation.

Core Competencies

- **Information Architecture:** Taxonomy, metadata strategy, content modeling, ontology, navigation structures
- **Structured Content:** Modular authoring, topic-based authoring, single-sourcing, DITA-aligned practices
- **Content Systems:** CCMS and structured-authoring platforms, version-controlled publishing workflows
- **UX & Usability:** User research, usability testing for documentation, content audits, UI text design
- **Technical Documentation:** Integration workflows, system behavior mapping, diagrams, SOPs, API documentation
- **Languages & Standards:** HTML, XML, Markdown, CSS fundamentals
- **Collaboration:** Cross-functional alignment with Product, Engineering, UX, QA, Support
- **Agile Delivery:** Sprint-based documentation, iterative design, multi-project prioritization
- **Development Literacy:** GitHub repository management, Git Bash workflows, and beginner-level reading of C# and Python scripts

Tools & Applications

- **Authoring & Publishing:** Paligo, oXygen XML Editor, Adobe RoboHelp, Zendesk Editor, Confluence, Unity 5.0
- **Version Control & API Tools:** GitHub, Git Bash, Visual Studio, Notepad++, Postman
- **Diagramming & Design:** Microsoft Visio, draw.io, Figma, FigJam, Adobe InDesign, Adobe Illustrator
- **Screen Capture & Recording:** Loom, Camtasia, Snagit, Flameshot, Greenshot
- **Project & Collaboration:** Jira, Zendesk, Miro, Notion, Asana

- **Productivity Suites:** Microsoft Office 365, Google Workspace, Adobe Acrobat Pro

Professional Experience

Career Break | 01/2026 – Present

- Took time off for health reasons; used the time to build hands-on experience in GitHub repository management, Git Bash workflows, Figma, and beginner-level C#.

Senior Technical Writer | Darwinbox | 09/2025 – 01/2026

- Designed structured content models for Payroll documentation, aligning format and terminology across user journeys.
- Partnered with UX and Product to align UI labels, error messages, and onboarding flows with IA and usability principles.
- Created persona-based content pathways to improve navigation for different user groups.
- Authored release documentation using structured prompt templates to streamline first drafts.

Senior Technical Writer | Oracle | 03/2024 – 09/2025

- Developed structured online help for Hire & Empower and Accounts Payable modules using oXygen XML and Git-based publishing.
- Reorganized content into reusable, metadata-driven components, aligning information architecture with product workflows.
- Conducted content audits and usability reviews to check that UI text and help content matched system behavior.
- Facilitated ASQ (Ask Several Questions) sessions with product, engineering, QA, and management to map user questions per feature and scope documentation needs.
- Authored release notes, upgrade notices, and PFCNs, focusing on clarity and change impact across modules.

Senior Technical Writer | Celigo | 07/2022 – 12/2023

- Built structured, persona-based documentation for integration solutions to support onboarding across user types.
- Designed workflow diagrams and integration maps to clarify complex system interactions.
- Wrote metadata-tagged UI help text aligned with integration behavior to reduce ambiguity for users.
- Documented configuration examples and code snippets with explanations of the underlying logic, for developer and admin users.

- Maintained Confluence dashboards for content governance, visibility, and stakeholder alignment.
- Mentored junior writers on structured authoring, taxonomy, and review best practices.

Technical Content Writer | Computer Generated Solutions | 02/2017 – 06/2022

- Developed structured documentation aligned with industry standards across multiple enterprise projects.
- Created process flow diagrams and system interaction maps for end-to-end workflows.
- Authored SOPs, installation guides, BCP/DR documents, and deployment content with clear modular structure.
- Standardized terminology and UI labels across applications to improve consistency.
- Managed release documentation for multiple products, keeping content accurate and on schedule.
- Served as documentation SPOC, coordinating with cross-functional teams on content accuracy and completeness.

Past Work Experiences

- Senior Technical Writer | Optum Global Solutions (Hyderabad, India) | 07/2015 – 11/2016
- Technical Communicator | ValueLabs (Hyderabad, India) | 04/2013 – 07/2015
- Process Specialist | Infosys BPO (Hyderabad, India) | 09/2009 – 04/2013
- Personal Banker (Trainee) | HDFC Bank (Hyderabad, India) | 11/2008 – 09/2009
- Customer Service Representative | HSBC GR (Hyderabad, India) | 07/2005 – 06/2008
